

FIRE BLANKET OPERATION

SMALL COOKING FIRES

CLOTHING FIRES

PULL TABS TO RELEASE

Open blanket fully and upright, while protecting hands

- Turn off the source of the heat
- Gently cover the flames & substance completely with the fire blanket
- Leave in place until cooled down completely
- Wrap blanket around victim to seal fire from air, being careful not to block airways
- Drop them to the ground and roll
- Seek medical attention

Fire Blankets can also be used when exiting a burning building. wrap it around yourself for added protection if there are flames between you and the exit.

EMERGENCY SERVICES

FIRE HOSE REEL OPERATION

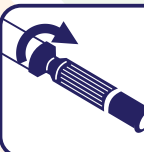

Only attempt to extinguish fire if safe to do so

- 

Ensure that the Fire Hose Reel is appropriate to use on this type of fire
- | MANUAL REEL | AUTOMATIC REEL |
|--|---|
| Open valve fully by turning anti-clockwise before running out hose | Water will turn itself on after running out hose (2-3m) |
- 

Pull out hose towards fire. Use at least two people for ease
- 

Always keep a safe exit route behind you (free from fire)
- 

Stay low to avoid heat & smoke. Keep 2-3 metres from fire
- 

Open nozzle clockwise to obtain spray. Continue turning for jet
- 

Aim water across the base of the fire/flames
- 

Apply the water in short sweeping bursts keeping out of the smoke/steam

DO NOT use on active/live electrical equipment.

If the fire becomes uncontrollable, retreat and close the door (do not lock)
